

VisionClaw Agent

Agentic AI Corporation Platform

Comprehensive Platform Guide — v5.6

A full-stack, multi-agent AI platform featuring 14 specialized AI personas that operate as a fully autonomous corporate team. Built with React, TypeScript, Express, and PostgreSQL.

AI Buddy LLC — Illinois, USA
March 2026

~70,000 lines of TypeScript | 200+ files | 49+ AI tools | 14 agents | 33+ database tables

Platform Overview

VisionClaw is a self-actualizing AI corporation platform that deploys 14 specialized AI agents as a coordinated corporate team. Each agent has unique expertise, personality, tools, and operating protocols. The platform handles marketing, research, finance, content, engineering, legal compliance, and operations — autonomously, 24/7.

The platform implements the Claude Opus 4.6 Agentic Spec for fully autonomous AI operations, with rules-driven governance based on NIST, OWASP, and Singapore IMDA standards. Agents escalate only mission-critical issues to human owners.

Architecture

- Frontend: React 18, Vite, shadcn/ui, TailwindCSS, Wouter, TanStack Query v5
- Backend: Express.js, TypeScript, Drizzle ORM, PostgreSQL, Zod, Helmet
- AI Streaming: Server-Sent Events (SSE) for real-time token streaming
- Multi-tenant: Complete data isolation with per-tenant rate limiting
- Single-port deployment: Frontend + API on port 5000

AI Provider Support

- OpenAI: GPT-5.4, GPT-5.1, GPT-5, GPT-5-Mini, GPT-5-Nano, GPT-4o, o4-mini
- Anthropic: Claude Opus 4.6, Claude Sonnet 4.6, Claude Sonnet 4
- Google: Gemini 3 Flash Preview, Gemini 2.5 Pro
- xAI: Grok 4.1, Grok-3, Grok-3-mini
- Perplexity: Sonar, Sonar Pro, Sonar Deep Research, Sonar Reasoning Pro
- OpenRouter: DeepSeek V3.2, DeepSeek R1, MiniMax M2.5, Qwen 3.5, Kimi K2.5, GLM-5, and more

Intelligent auto-routing classifies messages across 10 task categories and routes to the optimal model. Cost tier routing assigns the cheapest appropriate model to autonomous tasks.

The 14 AI Agent Team

Each agent has a unique identity with 8 document fields: Soul, Identity, Memory Doc, Operating Loop, Heartbeat Doc, Tools Doc, Agents Doc, and Brand Voice Doc.

VisionClaw — Personal AI Assistant

Always-on assistant. Handles any task, remembers everything, calls in specialists when needed.

Felix — CEO & Strategist

Makes strategic decisions, approves major actions, orchestrates complex multi-department operations.

Forge — Staff Engineer

Writes code, deploys integrations, debugs systems, builds technical solutions on demand.

Teagan — Content Marketing Lead

Plans campaigns, creates email sequences, drives marketing strategy across all channels.

Chief of Staff — Operations Director

Optimizes workflows, balances agent workloads, ensures the entire team runs smoothly.

Scribe — Content Creator

Writes blog posts, newsletters, documentation, landing pages, and long-form content.

Proof — Content Reviewer & QA

Reviews all content for quality, accuracy, brand voice, and compliance before publishing.

Radar — Intelligence Analyst

Monitors competitors, scans for opportunities, delivers real-time intelligence briefings.

Neptune — Deep Research Specialist

Conducts thorough multi-source research with full reports when Radar spots something worth investigating.

Apollo — Revenue Manager

Tracks revenue, manages invoicing, processes payments, optimizes financial pipeline.

Atlas — Metrics & Analytics

Builds dashboards, tracks KPIs, analyzes trends, provides data-driven recommendations.

Blueprint — Multi-Agent Operator

Designs and executes complex agent workflows where multiple personas collaborate.

Cassandra — Chief Financial Officer

Manages budgets, forecasts spending, tracks AI costs, ensures financial governance.

Luna — Legal & Compliance

Reviews contracts, ensures regulatory compliance, manages governance rules.

Platform Capabilities

AI-Powered Social Media

- AI image generation using Gemini Flash — platform-optimized graphics for X, LinkedIn, Instagram, Facebook
- Smart content drafting with brand-voice-aware formatting, hashtags, and CTAs
- Complete post composer — one command creates text + matching AI-generated image
- Social media publishing backend for X v2, LinkedIn UGC, and Instagram Graph API
- Per-tenant social account management with OAuth token storage

Autonomous Operations

- Heartbeat Engine — scheduled tasks run automatically (daily reports, market scans, health checks)
- CEO Orchestrator — complex requests decomposed into execution plans delegated across agents
- Agent-to-agent delegation with automatic task handoff and result synthesis
- Human-in-the-loop safety — high-risk actions require human approval
- 31 governance rules across 6 categories with emergency kill switch

Enterprise AI Tools

- PDF generation, analysis, and form filling with automatic Google Drive upload
- Full email inbox with AI-powered triage, drafting, and automated follow-ups (AgentMail)
- Code execution in hardened sandbox (JavaScript, Python, shell commands)
- Virtual browser with web research, screenshots, form filling, and credential vault
- Google Workspace integration (Gmail, Calendar, Contacts, Sheets, Docs)

Memory & Intelligence

- Three-tier persistent memory: short-term, working, and long-term with vector embeddings
- Knowledge base with document collections, semantic search, and hybrid BM25/vector modes
- Self-improvement engine — agents learn from failures and automatically improve
- Deep Research engine — Karpathy-inspired autonomous overnight research loops

Voice & Communication

- Real-time voice conversations with streaming speech-to-text and text-to-speech
- WhatsApp integration — chat with your AI team via messaging
- Embeddable chat widget for websites with public chat links
- Discord bot integration
- Multi-model intelligence: 40+ AI models across 6 providers

49+ Agentic Tools

AI agents can invoke 49+ server-side tools with multi-round execution loops (up to 5 rounds per turn). Tool calls stream as real-time SSE events.

System

test_api_keys, check_system_status, list_models, info, list, kill, killAll

Memory

search_memory, create_memory, update_memory, get_daily_notes, write_daily_note

Knowledge

search_knowledge, create_knowledge, doc_search

Communication

send_email, check_inbox, list_conversations

Web & Research

web_fetch, web_search, browser, deep_research

Content

generate_chart, show_diff, analyze_pdf

Social Media

generate_social_image, compose_social_post, publish_social_post, manage_social_accounts

Execution

exec, execute_code, plan_and_execute, llm_task

Agentic

delegate_task, sessions_spawn, sessions_list, sessions_send, subagents, lobster

Google

google_workspace (Gmail, Calendar, Contacts, Sheets, Docs)

Self-Improvement

create_tool, list_custom_tools, delete_custom_tool, log_experiment, run_self_improvement

Security & Compliance

- Multi-tenant data isolation with per-tenant rate limiting (10K cardinality cap)
- HMAC-SHA256 PIN authentication with timing-safe comparison
- AES-256-GCM encrypted credential vault for website logins
- Helmet CSP headers and SSRF protection for browser tool
- DB-persisted password reset tokens with expiration
- 31 governance rules based on NIST, OWASP, and Singapore IMDA frameworks
- Emergency kill switch for immediate agent shutdown
- Human-in-the-loop confirmation gate for high-risk actions

Payments & Billing

- Stripe Connect with subscription tiers (Free Trial, Starter, Pro, Enterprise)
- Coinbase Commerce for cryptocurrency payments
- BYOK (Bring Your Own Key) tier system with enhanced limits for own API keys

- Usage metering with daily message limits and conversation quotas
- Subscription OAuth (PKCE) — connect ChatGPT Plus or Gemini Advanced subscriptions

Pricing Plans

Free Trial — [/nix/store/smkzrg2vvp3lng3hq7v9svfni5mnqjh2-bash-interactive-5.2p37/bin/bash](#)

5 conversations, all 14 AI agents, voice + tools + memory, full feature access. No credit card required.

Starter — 9/mo

3 AI personas, 200 messages/day, 100 conversations/month, basic memory, email support. BYOK: 1,000 msgs/day, unlimited convos.

Pro — 9/mo (Most Popular)

5 AI personas, 1,000 messages/day, unlimited conversations, full memory + knowledge, voice conversations, social media tools, priority support. BYOK: 5,000 msgs/day, unlimited tools.

Enterprise — 99/mo

Full 14-agent team, 5,000 messages/day, autonomous heartbeat, advanced analytics, social media publishing, custom integrations, dedicated onboarding. BYOK: Unlimited everything.

BYOK Disclosure: When using your own API keys, response quality depends on your chosen AI provider.

VisionClaw provides the agent framework, tools, and orchestration.

Recent Updates

v5.6 — AI Image Generation & Social Media (March 22, 2026)

- AI-powered social media image generation using Gemini Flash
- Complete post composer — text + image in one command
- Social publishing backend (X, LinkedIn, Instagram)
- Landing page redesign with 5 capability sections
- In-app What's New changelog page

v5.5 — Production Hardening (March 22, 2026)

- Database connection pooling with production limits
- Per-tenant rate limiting replaces global limiter
- Graceful shutdown for zero-downtime deployments
- Cache TTL pruning to prevent memory leaks
- Authentication hardening

v5.4 — Virtual Browser & Web Automation

- Full virtual browser integration for agents
- Enhanced competitive intelligence with web monitoring

v5.3 — Financial Governance & Legal Compliance

- Cassandra (CFO) and Luna (Legal) agents added
- 31 governance rules with full audit trail
